EOS Majesty

Passion for Spa and Wellness Engineering

Passion for spa and wellness engineering is deeply rooted at EOS and can be felt in each of our products. An EOS product arouses desire and forms the basis for a place of relaxation. EOS products convey pure elegance and luxury. They combine aesthetics, quality and functionality in equal measure.

The passion for spa and wellness engineering has always been our motivation. Since the foundation in 1944, our company has experienced a rapid and steady development. From market leader for design sauna heaters, EOS has developed into the luxury brand for spa and wellness hardware for private and commercial use with a large range of sauna heaters, infrared and steam room equipment, the corresponding control units and a wide range of accessories.

However, the focus of our activities has always been the idea to realize high-quality spa and wellness hardware with which wellness oases can be equipped to meet the highest demands.

Our recipe for success are contemporary, technically innovative products of the highest quality, with a trend-setting and, if desired, extravagant design.

EOS products are sold in over 80 countries worldwide. They are the result of intensive engineering, the use of highest quality materials and the most careful manufacturing. We focus on the combination of modern production facilities and elaborate craftsmanship.

Our products are manufactured exclusively in our manufactory in Driedorf, Germany. On site we have the opportunity to expand the know-how of our employees over the long term, thus permanently manifesting the highest level of quality. It is therefore a standard procedure that each individual product is subjected to extensive tests before delivery. Our products impress with maximum durability and contribute to a unique sense of well-being through the combination of functionality and design.

EOS Majesty

„Straightforwardness and the appealing contrast define the design language of the EOS Majesty“

Design in pure form

The EOS Majesty combines majestic design with innovative construction. The surrounding slats made of polished stainless steel in combination with elegant matt black and white quartz stones emphasize the extraordinary aesthetics of this sauna heater.

Due to the clear design language, it fits perfectly into modern, high-quality sauna cabins. With its uniform appearance on all sides, it can be placed freely in front of glass surfaces or in the center of the sauna, where it can fully develop its exclusive character. Due to its smart dimensions, it requires less space.

We back our product promise of maximum durability with a warranty of 8 years.

Unique and clear

The slanted slats above the rock store are not just a design element, they direct the air in a targeted manner and thus ensure optimal heat distribution in the sauna cabin. These slats are picked up again at the base and round off the unique, clear design of the sauna heater.

The 25kg sauna stone set, consisting of diabase stones and white quartz stones, ensures complete and sensual sauna pleasure.

Holistic approach

Perfection down to the smallest detail is demonstrated by the available heater guard rail with puristic brackets. These variably attachable brackets enable quick and easy installation.

You can choose between the heater guard rail in abachi or walnut wood. If a heater guard rail that matches the wood of the sauna cabin is desired, the mounting brackets are also available individually.

The EOS Majesty also impresses in terms of safety. The EOSafe L safety system, which is discreetly attached to the heater, can be easily attached to the upper slat above the rock store on the right or left.
